WORK EXPERIENCE

Senior Software Engineer (Payment Platform)

PayIt LLC

📅 Dec 2019 - current 📍 Kansas City, MO

- Spearheaded the efforts to implement a secure payment vaulting/tokenization system, integrate with major payment processors, and become a payment facilitator.
- Implemented a website/app builder to provide a white-label solution for government entities to collect payment for public services such as property taxes, DMV and tolling.
- Designed tooling for payment transaction auditing, disbursements, reporting, merchant onboarding and management for clients.
- Responsible for regulatory and compliance to allow storage and collection of payment information domestically and internationally.
- Worked with platform engineering to build a scalable and secure infrastructure by leveraging AWS GovCloud.
- Implemented a point-of-sale terminal solution to expand the company's reach into physical government locations.

Senior Software Engineer (Revenue Cycle)

Cerner

📅 Feb 2015 - Dec 2019 📍 Kansas City, MO

- Built and deployed cloud-based Revenue Cycle solutions to digitize medical records for clinics and hospitals.
- Created internal tooling and processes to improve the organization's CI/CD pipelines to reduce engineering burden on testing and deployment process.
- Served as technical lead on multiple projects by working with stakeholders and other engineers to help bring Cerner Revenue Cycle solutions into European markets.
- Worked with design and product teams to revamp the company's aging Revenue Cycle scheduling software to be web and mobile-friendly.

Creator

Cookieify - Khant LLC (E-Commerce)

📅 Nov 2015 - current 📍 Kansas City, MO

- Maintains a 3D print on demand shop bringing custom products and prototypes.
- Implemented a retail shop on multiple platforms such as Shopify, Etsy, eBay, Prestashop, Wordpress and Facebook.
